

## NOTICE OF DUPLICATION

An article recently published in *JACC* by Piljs et al. (J Am Coll Cardiol 2012;59:1045–57) duplicates to a considerable extent both the text and figures of a prior article published by De Bruyne et al. in *HEART* (Heart 2008;94:949–59. doi:10.1136/hrt.2007.122838). Dr. Piljs attributes this duplication to the close collaboration that he has had over many years with Dr. De Bruyne, and the fact that both authors drew text and figures for these reviews from the same repository of material used for a joint educational program. He acknowledges his lack of care in the preparation of the manuscript and apologizes for the duplication. While the Editors accept this apology, we lament the replication of information that prevented the pages devoted to Dr. Piljs' article from being filled with new material.

## CORRECTIONS

**Latib A, Colombo A, Castriota F, Micari A, Cremonesi A, De Felice F, Marchese A, Tespili M, Presbitero P, Sgueglia GA, Buffoli F, Tamburino C, Varbella F, Menozzi A. A Randomized Multicenter Study Comparing a Paclitaxel Drug-Eluting Balloon With a Paclitaxel-Eluting Stent in Small Coronary Vessels: The BELLO (Balloon Elution and Late Loss Optimization) Study. J Am Coll Cardiol 2012;60:2473–80.**

The rates of angiographic restenosis and MACE in the Abstract are incorrect and do not correspond with the correct values in the text and Tables. The last sentence of the Results section of the abstract should read as follows:

At 6 months, DEB and PES were associated with similar rates of angiographic restenosis (10% vs. 14.6%;  $p = 0.35$ ), target lesion revascularization (4.4% vs. 7.6%;  $p = 0.37$ ), and MACE (10% vs. 16.3%;  $p = 0.21$ ).

The authors apologize for the errors.
